

I have been a customer for almost two years now and one of the best thing That I have noticed is the XM Instant Traffic & Weather. Its on continuously 24/7 giving me information while I am driving to make alternate plans in case of traffic. No other regular radio station offers that information. The only one i know that gives an update every 10 mins is WTOP Radio. But the problem with that is they have a minute to give you traffic conditions in the entire C metro area and its hard for them to cover all the areas. There have been numerous times i have gone based on what they said and got stuck in traffic. I am writing this to urge you to reject the NAB's petition 04-160 so that people like us who pay for the service can get programming and information when we want it accurately.

Thanks
